JHU Applied Physics Laboratory Colloquia
January 3, 2024

www.jhuapl.edu/colloquium/archive colloquium@jhuapl.edu

2023 – 2024

Mark Shelhamer (Johns Hopkins University School of Medicine) *Preparing for the Unpredictable: Facilitating Multi-System Resilience in Human Spaceflight.* December 15, 2023.

Jenna Carpenter (Campbell Univ.) *Making STEM More Inclusive and Diverse: Research Best Practices That Work.* December 8, 2023.

Christina Koch (NASA Astronaut) *Human Spaceflight: A Mission to ISS by a Former APLer.* December 1, 2023.

Dr. Jason Kalirai, Dr. Nour E. Raouafi, and Dr. Daniel Müller (JHU/APL and ESA ESTEC) *Extreme Exploration: Parker Solar Probe and Solar Orbiter Trailblazing Around the Sun.* November 17, 2023.

J. Kevin White (Founder and Executive Director, Global Vision 2020) *Life After the Marine Corps - Continuing to Serve Others Through Global Vision 2020.* November 6, 2023.

Carter Brandon (World Resources Institute) *The Macro-Critical Risks of Climate Change: Water and Beyond.* November 3, 2023.

Richard B. Frank (Historian) *Tower of Skulls: A History of the Asia-Pacific War.* October 31, 2023.

Michael Levin (Tufts Univ.) *Bioelectricity as Cognitive Glue: From Diverse Intelligence to Regenerative Medicine.* October 27, 2023.

Maj. Gen. Gregg F. Martin, Ph.D. (U.S. Army (ret.)) *BIPOLAR GENERAL: My Forever War With Mental Illness.* October 12, 2023.

Dennis E. Seymour Ph.D. (Eastern Band Cherokee) (Baltimore American Indian Center) *Indian – 101; Everything That You Wanted to Know About American Indians, but Were Afraid to Ask.* October 6, 2023.

2022 – 2023

Phil Koopman (Carnegie Mellon Univ.) *How Safe Is Safe Enough for Autonomous Vehicles?* September 29, 2023.

Yaneer Bar-Yam (New England Complex Systems Institute) *Understanding Society Based on Its Control Parameters.* September 22, 2023.

Robert Panas (Bright Silicon Technologies) *Solid-State Beamsteering With the Lightfield Directing Array.* September 8, 2023.

Andy Hoehn and Thom Shanker (RAND Corp. and George Washington Univ.) *Age of Danger: Keeping America Safe in an Era of New Superpowers, New Weapons, and New Threats.* August 31, 2023.

Brent Sadler (U.S. Navy (ret.)) *A New Model Navy for an Era of Great Power Rivalry.* August 18, 2023.

Philip Shackelford (Military Historian) *Priority One: Securing Cryptologic Freedom in the U.S. Air Force.* June 30, 2023.

Yusuke KAWACHI (Colonel, Japan Ground Self-Defense Force and Military Attaché, Embassy of Japan in the U.S.A.) *The Case for Japanese Land Power in the First Island Chain.* June 23, 2023.

Diane Bernier (Executive Director, Fidos For Freedom) *Fidos for Freedom.* June 16, 2023.

Jay Brett (JHU/APL) *Pride and Physical Oceanography.* June 9, 2023.

Paul Stillwell (Historian) *Scientist in Uniform: Vice Admiral Willis A. Lee, Jr.* June 2, 2023.

Peter Zeihan (Zeihan on Geopolitics) *Looking Past the End of the World.* May 26, 2023.

Wendy Bohon (Science Communication Consultant) *Trust Me, I'm a Scientist: The Science of Science Communication.* May 19, 2023.

Robert Haddick (Mitchell Inst. for Aerospace Studies, USMC (ret.)) *The Taiwan Flashpoint: Scenarios, Capability Gaps, and Deterrence.* May 12, 2023.

Vicki Ferrini (Lamont-Doherty Earth Observatory, Columbia Univ.) *Increasing Accessibility of Marine Geoscience Data.* May 5, 2023.

Rama Chellappa (Bloomberg Distinguished Professor, JHU) *Can We Trust AI?* April 28, 2023.

Marc Kolodner (JHU/APL) *From the Open Ocean to the Ukraine War, Changing the Way We See the World Through Commercial Satellite Imagery.* April 21, 2023.

Margaret Sankey (Air University) *Blood Money: How Criminals, Militias, Rebels, and Warlords Finance Violence.* April 14, 2023.

Tom Ramos (Lawrence Livermore National Laboratory) *Nuclear Threats Thrown at America Before There Was a Putin.* April 12, 2023.

Craig Symonds (Prof. Emeritus, U.S. Naval Academy) *Nimitz at War: Command Leadership From Pearl Harbor to Tokyo Bay.* April 7, 2023.

Jennifer B. Litchman (Univ. of Maryland, Baltimore) *On Becoming a Self-Aware Leader.* March 31, 2023.

Jamon "Ham" Bailey (Sr. Learning Consultant) *Rise to the Opportunity.* March 30, 2023.

Porter Halyburton (Prof. Emeritus, Naval War College) *Reflections on Captivity -- A Tapestry of Stories by a Vietnam War POW.* March 24, 2023.

Larrie D. Ferreiro (George Mason Univ.) *Churchill's American Arsenal: The Partnership Behind the Innovations That Won World War Two.* March 17, 2023.

Taylor D. Sparks (Univ. of Utah) *Materials Informatics: Moving Beyond Screening via Generative Machine Learning Models.* March 10, 2023.

Col. Wendell B. Leimbach Jr. (USMC; Director, Joint Intermediate Force Capabilities Office) *DoD Intermediate Force Capabilities: Bringing the Fight to the Gray Zone.* March 3, 2023.

Sean Carroll (Homewood Professor of Natural Philosophy, JHU) *From Quantum Mechanics to Spacetime.* February 24, 2023.

GEN Larry O. Spencer (USAF (ret.)) *Dark Horse: General Larry O. Spencer and His Journey From the Horseshoe to the Pentagon.* February 17, 2023.

Michael T. Menzel (JWST Mission Systems Engineer, NASA) *The James Webb Space Telescope.* February 3, 2023.

Tim Jorgensen (Georgetown Univ.) *Spark: The Shared Origin Story of the Electrical and Neurological Sciences.* January 20, 2023.

Bilyana Lilly (Cybersecurity Consultant and Author of Russian Information Warfare) *Russian Information Warfare: Assault on Democracies in the Cyber Wild West.* January 13, 2023.

Trent Hone (Naval Historian) *Mastering the Art of Command: The Strategic Artistry of Admiral Nimitz.* January 6, 2023.

Roderick G. Eggert (Colorado School of Mines) *Energy Critical Materials and Their Supply Chains - The Economic and Policy Context.* December 2, 2022.

Pat Scannon (Project Recover) *PROJECT RECOVER: The Impact of Returning MIAs on Family and Community.* November 10, 2022.

Shannon MacKenzie, Haje Korth, Zibi Turtle, and Karen Kirby (JHU/APL Space Exploration Sector) *APL's Exploration of Our Solar System's Ocean Worlds.* November 4, 2022.

Mike Gruntman (Univ. of Southern California) *Intercept 1961: From Air Defense SA-1 to the Birth of Soviet Missile Defense.* October 31, 2022.

Michael Fabey (Author and Journalist) *Heavy Metal: The Hard Days and Nights of the Shipyard Workers Who Build America's Supercarriers.* October 28, 2022.

Catherine Musemeche (Author) *Mary Sears and the Race to Solve the Ocean in World War II.* October 21, 2022.

Amy Zegart (Hoover Institution) *How Technology Is Changing American Intelligence.* October 18, 2022.

Ernest Snowden (Author) *Maritime Unmanned - From BAMS to TRITON.* October 14, 2022.

Kathleen Rowen (APL National Security Analysis Department) *The Ukraine Crisis: APL's Analytical Capabilities in Action.* October 7, 2022.

2021 – 2022

Jonathan Parshall (Historian and Author) *What Was Nimitz Thinking?: An Analysis of American Battle Planning for Midway.* September 30, 2022.

Sarah Greenstreet (Univ. of Washington) *The Solar System's Most Unusual Objects: The Dynamics of Inner-Venus and Retrograde Asteroids.* September 23, 2022.

Jorge Salazar-Cerreño (Univ. of Oklahoma) *Design Aspects of Multifunction Phased Array Radars and Future Research Directions.* September 16, 2022.

James J. Wynne (IBM Research) *Illuminating My Career – From Flash Gordon to Laser Surgery.* September 9, 2022.

Timothy Leighton (Southampton Univ.) *Is the Public Exposed to Airborne Ultrasound, and Are There Adverse Effects?* June 24, 2022.

Col. A. "Buz" Carpenter (USAF (ret.)) *The Creation & Operations of the SR-71 – A Legacy of Unequaled Excellence.* June 17, 2022.

Konstantina Trivisa (Univ. of Maryland) *An Efficient Quantum Algorithm for Dissipative Nonlinear Partial Differential Equations.* June 10, 2022.

Elbridge Colby (The Marathon Initiative) *The Strategy of Denial: American Defense in an Age of Great Power Conflict.* June 3, 2022.

VADM Raquel "Rocky" Bono (APL Senior Fellow, U.S. Navy (ret.)) *Lessons Learned About Genuine Leadership.* May 20, 2022.

Virginia Postrel (Author) *The Fabric of Civilization: How Textiles Made the World.* May 13, 2022.

Guy Thomas (C-SIGMA) *A Silent Warrior Steps Out of the Shadows.* May 6, 2022.

Peter Worcester (Scripps Institution of Oceanography) *Ocean Acoustics in the Changing Arctic.* April 29, 2022.

Dr. Daniel Geschwind (UCLA) *The Human Brain on a Continuum: The Genetics Behind Autism Spectrum Disorder.* April 26, 2022.

Prabhakar Pathak (Ohio State Univ. emeritus) *Ray and Wave Optical Methods for Solving Large EM Radiation and Scattering Problems.* April 22, 2022.

Peter Schwartz (Salesforce.com) *A Dangerous Decade Ahead.* April 19, 2022.

Rose Gottemoeller (Stanford Univ.) *Replacing New START After Ukraine and the Nuclear Posture Review.* April 15, 2022.

Surjeet Rajendran (Johns Hopkins Univ.) *Opening Up the Gravitational Wave Spectrum.* April 8, 2022.

Ron Hetrick (EMSI Burning Glass) *The Demographic Drought: How a Lack of People Will Change How We Look at Labor.* April 1, 2022.

Liz Specht (The Good Food Institute) *Technological Challenges and Opportunities in the Emerging Field of Alternative Proteins.* March 25, 2022.

Sarah Stewart Johnson (Georgetown Univ.) *Contending With the Truly Alien.* March 18, 2022.

MGEN Mari K. Eder (U.S. Army (ret.)) *The Girls Who Stepped Out of Line - Then and Now.* March 11, 2022.

Mary Ann Hellrigel (IEEE History Center) *The Telephone Ladies and Bell System's "Spirit of Service" During World War II.* March 4, 2022.

Andrea Alù (City Univ. of New York) *Extreme Wave Phenomena in Metamaterials With Broken Symmetries.* February 25, 2022.

MAJGEN Mick Ryan AM (Australian Army (ret.)) *War Transformed: The Future of Twenty-First-Century Great Power Competition and Conflict.* February 22, 2022.

Nadia Nurhussein (Johns Hopkins Univ.) *"Mad Waters of the World-Sea": Oceanic Humanities and the Black Diaspora.* February 18, 2022.

Jonas Peters (Univ. of Copenhagen) *The Raven's Hat: Fallen Pictures, Rising Sequences, and Other Mathematical Games.* February 11, 2022.

MAJ Aaron Canciani (U.S. Air Force) *Absolute Positioning Using the Earth's Magnetic Field.* February 9, 2022.

Lewis Dartnell (Univ. of Westminster) *The Knowledge: How to Rebuild Our World From Scratch.* February 4, 2022.

Alice Bowman (JHU/APL) *NASA's New Horizons Mission: Beyond Pluto.* January 28, 2022.

Frank Hoffman (National Defense Univ.) *Mars Adapting: Military Change During War.* January 28, 2022.

Melanie Mitchell (Santa Fe Institute) *Why AI Is Harder Than We Think.* January 21, 2022.

Charles Adler (St. Mary's College of Maryland) *Where Is the Science in All That Fiction?* January 14, 2022.

Ken Allen and Brendan Mulvaney (USAF China Aerospace Studies Inst.) *A Day in the Life of a PLA Air Force and Naval Aviation Unit.* January 11, 2022.

Mark Treanor (Author) *A Quiet Cadence, a Novel About Combat and Its Aftermath.* January 7, 2022.

Juan Maldacena (Institute for Advanced Study, School of Natural Sciences) *Black Holes and the Structure of Spacetime.* December 17, 2021.

Michael Krepon (The Stimson Center) *Winning and Losing the Nuclear Peace.* December 14, 2021.

Paul N. Stockton (JHU/APL Senior Fellow) *Defeating Coercive Information Operations in Future Crises.* December 10, 2021.

LT David West (U.S. Navy) *Terminal Effects of Hypersonic Weapon Impacts.* December 8, 2021.

Jennifer Wilcox (National Cryptologic Museum) *Talking in Code.* December 3, 2021.

Ken Falke (Founder/Chairman, Boulder Crest Foundation) *Struggle Well, Thriving in the Aftermath of Trauma.* November 19, 2021.

Skip Finley (Author) *Whaling Captains of Color: America's First Meritocracy.* November 5, 2021.

Michael Brenner (School of Engineering and Applied Science, Harvard Univ.) *Science and Cooking -- Teaching Physics to Undergraduates (And the World!) Through Cooking.* October 29, 2021.

Frank von Hippel (Univ. of Arizona) *The Chemical Age: Pesticides and Chemical Weapons From World War I to the Vietnam War.* October 22, 2021.

LT Elih M. Velazquez-Delgado (Armed Forces Radiobiology Research Institute) *America's Military – A Profession of Arms.* October 15, 2021.

Chris Fisher (Founder/Co-director of the Earth Archive and Professor, Colorado State Univ.) *The Case for an Earth Archive.* October 1, 2021.

2020 – 2021

David Bader (New Jersey Inst. of Technology) *The International Race to Exascale Supercomputing.* September 24, 2021.

Danny Price (International Centre for Radio Astronomy Research at Curtin Univ.) *AI and ETI: The Breakthrough Listen Search for Intelligent Life.* September 17, 2021.

VADM John J. Donnelly (US Navy (ret.)) *Ice Exercise (ICEX) 2007 – Research, Tactical Development, and Tragedy.* September 9, 2021.

Alison Criscitiello (Univ. of Alberta, Exec. Dir. Canadian Ice Core Lab) *Stories From the Ice: Perspectives From New Canadian Arctic Ice Cores.* September 3, 2021.

David Albright (Institute for Science and International Security) *Iran's Perilous Pursuit of Nuclear Weapons.* July 23, 2021.

George Galdorisi and Sam Tangredi (Naval Information Warfare Center Pacific and US Naval War College) *Algorithms of Armageddon: What Happens When We Insert AI Into Our Military Weapons Systems?* July 16, 2021.

LT Matthew Henricks (US Navy) *Analysis of Rapidly Printed Flexible Metamaterials for Microwave Weapon Defense.* July 9, 2021.

Cato Milder (Vanderbilt Univ.) *The Contribution of Uranium Workers to Radiation Epidemiology.* June 25, 2021.

CAPT Matthew "Beaker" Culp (CNO's Strategic Action Group, U.S. Navy) *Advantage at Sea – Prevailing With Integrated All-Domain Naval Power.* June 16, 2021.

Christian Brose (Chief Strategy Officer, Anduril Industries) *Disrupting National Defense: A Conversation With Christian Brose.* June 11, 2021.

Tuan Do (UCLA Galactic Center Group) *The Galactic Center: A Laboratory for the Study of the Physics and Astrophysics of Supermassive Black Holes.* June 4, 2021.

Roopa Unnikrishnan (Vontier Corporation) *Building an Innovation Culture in the Midst of Change.* May 28, 2021.

Jim Bellingham (Executive Director, Institute for Assured Autonomy, Johns Hopkins Univ.) *Autonomy at the Edge.* May 21, 2021.

Patrick K. O'Donnell (Historian and Author) *The Indispensables: Marblehead's Diverse Soldier-Mariners Who Shaped the Country, Formed the Navy, and Rowed Washington Across the Delaware.* May 19, 2021.

Jeff Hawkins (Numenta) *"A Thousand Brains: A New Theory of Intelligence" With Jeff Hawkins.* May 14, 2021.

Dan Esty (Director, Yale Center for Environmental Law and Policy) *America's Zero Carbon Action Plan.* May 7, 2021.

A.J. Simon and Hannah Goldstein (Lawrence Livermore National Lab) *The U.S. Energy System in the Age of Abundance.* April 30, 2021.

Jennifer Ackerman (Author) *The BIRD WAY: A New Look at How Birds Talk, Work, Play, Parent, and Think.* April 23, 2021.

Alexandra Samuel (Data Journalist and Tech Writer) *Neurodiversity and the Future of Work.* April 16, 2021.

Nicholas Pyenson (Smithsonian Institution) *Spying on Whales.* April 9, 2021.

Alison Hill (Institute for Computational Medicine, Johns Hopkins Univ.) *The Mathematics of Contagion: COVID-19 and Beyond.* April 2, 2021.

Paris R. von Lockette (Penn State Univ.) *Magneto-Active Composites, Multi-Field Processing, and a Quest for a Universal 3D Printer.* March 26, 2021.

Laura Micheletti Puaca (Christopher Newport Univ.) *The Search for "Scientific Womanpower": Challenging Gender Stereotypes in STEM in World War II and the Cold War.* March 19, 2021.

David W. Jordan (Case Western Reserve Univ.) *State of the Art Magnetic Resonance Imaging in Medicine.* March 5, 2021.

Martin Hellman (Stanford Univ.) *Rethinking National Security.* March 2, 2021.

Scott Ransom (NRAO) *Arecibo's Pulsar Legacy: nHz-frequency Gravitational Waves With NANOGrav.* February 26, 2021.

Ronald Ferguson (Harvard Kennedy School) *Why and How We Need to Engage Whole Communities in Child Development, Starting From Birth.* February 19, 2021.

Mark Maslin (Univ. College London) *How Celestial Mechanics Influenced Early Human Evolution and Dispersal.* February 12, 2021.

Thomas Wildenberg (Independent Historian and Scholar) *Charles Stark Draper and the Origins of Inertial Navigation.* February 5, 2021.

Stuart Russell (U.C. Berkeley) *Artificial Intelligence: A Modified Approach.* January 29, 2021.

Megan McKenna (Stanford Univ.) *Acoustic Ecology: How Sound Shapes the World Around Us.* January 22, 2021.

Jamie Holmes (Author and Future Tense Fellow, New America) *Section T, the Smart Fuse, and the Founding of APL.* January 15, 2021.

Matt Zullo (U.S. Navy (ret.)) *The U.S. Navy's on-the-Roof Gang.* January 8, 2021.

David Allison (Indiana Univ. School of Public Health-Bloomington) *Reproducibility and Replicability in Science.* December 11, 2020.

Kerri Phillips and Sylvie DeLaHunt (JHU/APL) *Breaking Down Barriers to Diversity and Inclusion in STEM.* December 4, 2020.

Lewis Dartnell (Univ. of Westminster) *ORIGINS: How the Earth Shaped Human History.* November 20, 2020.

Patrick K. O'Donnell (Historian and Author) *The Unknowns: The Untold Story of the Tomb of the Unknown Soldier and WWI's Most Decorated Heroes Who Brought Him Home.* November 13, 2020.

Mike Dahm (JHU/APL) *A Virtual Tour of China's Artificial Islands in the South China Sea.* November 6, 2020.

Min-Yang Chou (Univ. Corp. for Atmospheric Research (UCAR)) *The Persistent Impacts of the 2011 Tohoku Earthquake/Tsunami on Ionospheric Space Weather.* October 30, 2020.

Stephen Phillips (JHU/APL) *Two Midshipmen: The Founding of the U.S. Naval Academy.* October 23, 2020.

Edward S. "Ted" Brodkin M.D. (Univ. of Pennsylvania Perelman School of Medicine) *Developing a Program to Provide Support in Social Functioning for Adults on the Autism Spectrum.* October 16, 2020.

Douglas M. O'Reagan (Author) *Taking Nazi Technology: Allied Exploitation of German Science After the Second World War.* October 9, 2020.

David Kilcullen (Cordillera Applications Group) *The Dragons and the Snakes: How the Rest Learned to Fight the West.* October 2, 2020.

2019 – 2020

David Albright (Founder and President, Inst. for Science and International Security) *Taiwan's Nuclear Weapons Program: Its History, Dismantlement, and Lessons for Today.* September 23, 2020.

Peter W. Singer (Senior Strategic Fellow, New America Foundation) *Burn-In: The Real Robotics Revolution.* September 18, 2020.

Mario Livio (Astrophysicist and Author) *GALILEO and the Science Deniers.* September 11, 2020.

Jennifer Wilcox (Worcester Polytechnic Institute) *A Case for Carbon Dioxide Removal From Air.* September 4, 2020.

LT Brian Gureck (U.S. Navy) *Resolving Bearing Ambiguity With a Single Bio-Inspired Direction Finding MEMS Acoustic Sensor.* August 14, 2020.

Francis Gary Powers Jr. (Founder and Chairman Emeritus, The Cold War Museum) *Spy Pilot: Francis Gary Powers, the U-2 Incident, and a Controversial Cold War Legacy.* August 7, 2020.

James E. "JB" Brown III (National Test Pilot School) *Flying Lockheed's Stealth Fighters.* July 31, 2020.

Walter Gordon (MOOG Space and Defense Group) *Once There Was an Arrow.* July 24, 2020.

Norman Polmar (Analyst, Author, and Consultant) *Surprise! Western Intelligence and Warning Failures.* July 17, 2020.

Mark Kortepeter, MD, MPH (Univ. of Nebraska Medical Center) *Tales From Inside the Hot Zone.* June 26, 2020.

Leonard Rodberg (Queens College/CUNY) *Climate Change, Renewables, and Nuclear Energy: Which Path to Follow?* June 12, 2020.

Heather Massie (Fulbright Specialist, Writer/Producer/Performer of "HEDY! The Life & Inventions of Hedy Lamarr") *A Salon Lecture on Hedy Lamarr, Hollywood Screen Siren & Inventor of Spread Spectrum Technology, With Scenes From the Award-Winning, Internationally-Acclaimed "HEDY! The Life & Inventions of Hedy Lamarr."* March 6, 2020.

Martha Jones (Johns Hopkins Univ.) *Vanguard: What if Black Women Have Always Led the Movement for Women's Suffrage.* February 27, 2020.

James E. West (Johns Hopkins Univ.) *Piezoelectric and Electret Polymers.* February 21, 2020.

Tim Lattimer (Environmental Diplomat) *Global Climate Change and Why Local Action Is Vital.* February 14, 2020.

Bret Kugelmass (Managing Director, Energy Impact Center) *Nuclear Energy's Role in Achieving Deep Decarbonization to Reverse Climate Change.* February 7, 2020.

Garrett "Sack" Harencak (IRES Deputy Program Manager, Jacobs Missile Defense Group) *Five Myths of Nuclear Deterrence.* January 31, 2020.

Maj. Jarrod Robinson (US Marine Corps) *Protecting Our Nation's Warriors: Encapsulated Ceramic Spheres vs Monolithic Ceramic Plates for Body Armor Applications.* January 24, 2020.

Servio H. Ramirez (Temple Univ.) *Protection, Diagnosis, and Tissue Engineering of the Blood-Brain Barrier: Emerging Concepts to Improve Outcomes in Civilian and Military Traumatic Brain Injury.* January 17, 2020.

Magnus Nordenman (Consultant and Author) *The New Battle for the Atlantic: Emerging Naval Competition With Russia in the Far North.* January 10, 2020.

Lt. Gen. Steve Kwast (USAF ret.) *The Space Force? Why? When? What For?* January 3, 2020.

David Sing (Bloomberg Distinguished Prof. of Astrophysics, Johns Hopkins Univ.) *Hubble's Panchromatic Comparative View of Exoplanet Atmospheres.* December 20, 2019.

Dian Olson Belanger (Historian and Author) *Science, Politics, and Peace: Antarctica and the International Geophysical Year.* December 13, 2019.

Sufi Zafar (IBM T. J. Watson Research Center) *CMOS Compatible Chemical Sensors for Healthcare Applications.* December 11, 2019.

John O'Hara (NSA (ret.)) *Analysis of Soviet Space and Missile Programs During the Early Cold War.* December 6, 2019.

Nour E. Raouafi (JHU/APL) *Parker Solar Probe: First Discoveries and Outlook of the Mission.* December 2, 2019.

Robert Leonhard (JHU/APL) *Visions of Apocalypse: How Beliefs About the End Times Affect International Relations.* November 22, 2019.

Toshi Yoshihara (Center for Strategic and Budgetary Analysis (CSBA)) *Chinese Seapower.* November 15, 2019.

Stephen Moore (Author and Journalist) *UNCOMMON VALOR: Recon Company Medal of Honor Heroes of FOB-2.* November 8, 2019.

Lawrence Goldstone (Author) *Going Deep: John Philip Holland and the Invention of the Attack Submarine.* November 1, 2019.

David Blodgett (JHU/APL) *Optical Imaging of the Brain: Is There Really Anything to See?* October 25, 2019.

Larrie D. Ferreiro (George Mason Univ.) *Brothers at Arms: American Independence and the Men of France and Spain Who Saved It.* October 18, 2019.

Dr. Etta Pisano, M.D., FACR (Beth Israel Deaconess Medical Center) *The Tomosynthesis Mammographic Imaging Screening Trial (TMIST) – A Bridge to Personalized Breast Cancer Screening.* October 16, 2019.

Héctor L. Díaz (Hispanics In History Cultural Organization) *The Hispanic Assistance to the American Revolution.* October 11, 2019.

Andrés Muñoz-Jaramillo (Southwest Research Institute) *How the Hemispheric Polar Field Reversal Sets the Timing and Shape of the Solar Cycle.* October 9, 2019.

Dave "Bio" Baranek (Author, "TOPGUN Days") *Topgun and Tomcats: High Explosives, Type-a Personalities, and Prandtl–Meyer Expansion Fans.* October 4, 2019.

2018 – 2019

Mojie Crigler (END Fund) *Under the Big Tree: Extraordinary Stories From the Movement to End Neglected Tropical Diseases.* September 27, 2019.

CAPT Mercedes Benitez-McCrary, Dr.HSc, MA CCC-SLP (Chief Professional Officer - Chief Therapist Officer, United States Public Health Service) *"Puentes Y Verjas" – Hispanic Health.* September 20, 2019.

Eric Haseltine (Analyst and Consultant) *The Spy in Moscow Station: A Counterspy's Hunt for a Deadly Cold War Threat.* September 13, 2019.

Muhammad Fraser-Rahim (Quilliam International) *Alternative Narratives to Violent Extremism: Case Study Examples on Rehabilitation in the US and Overseas.* September 4, 2019.

Norman Polmar, RADM Thomas Brooks, and George Fedoroff (Author & Analyst, US Navy (ret.), and ONI) *Admiral Gorshkov: The Man Who Challenged the U.S. Navy.* August 30, 2019.

Jeffrey Kosseff (U.S. Naval Academy) *The Twenty-Six Words That Created the Internet.* August 23, 2019.

Ernie Snowden (U.S. Navy (ret.)) *Winged Brothers: Naval Aviation as Lived by Ernest and Macon Snowden.* August 16, 2019.

Mr. Douglas Loverro (Deputy Assistant Secretary of Defense, Space Policy (Ret.)) *The History of Space in National Security.* August 5, 2019.

Douglas Burnett (Chief Counsel, Maritime Administration, US Dept. of Transportation) *The "Cloud" Is Beneath the Sea: Why International Law of the Sea Is a Critical Factor in the Astonishing Growth of Submarine Cables.* August 2, 2019.

James "Nick" Ashworth (NAVAIR Cyber Test and Evaluation Group) *My Experiences Hacking Automobiles, Ships, and Airplanes.* July 12, 2019.

Walter Gordon (Niagara Aerospace Museum & MOOG Space and Defense Group) *Project Gemini: Unsung Hero of Neil Armstrong's One Small Step.* June 25, 2019.

Kevin Baker (Author) *America the Ingenious: How a Nation of Dreamers, Immigrants, and Tinkerers Changed the World.* June 21, 2019.

John Astin (Theatre Program Director, JHU Homewood) *Knowledge and Wisdom.* June 14, 2019.

Charles F. Delwiche (Univ. of Maryland College Park) *Social Diversity in Humans and Biological Diversity in Algae: Implications for Resilience of Communities.* June 7, 2019.

Capt. John E. Jackson (U.S. Navy (ret.)) *One Nation, Under Drones.* May 31, 2019.

Robert Leonhard and Stephen Phillips (JHU/APL) *"Little Green Men": A Primer on Modern Russian Unconventional Warfare, Ukraine 2013-2014.* May 24, 2019.

Sally Mott Freeman (Author) *The Jersey Brothers: A Missing Naval Officer in the Pacific and His Family's Quest to Bring Him Home.* May 17, 2019.

Victoria Meadows (University of Washington & NExSS) *Prospects for Characterizing Terrestrial Exoplanets With the James Webb Space Telescope.* May 10, 2019.

Ramesh Varma (Northrup Grumman (ret.)) *Coming to America: Challenges for an Asian-American.* May 3, 2019.

Joseph Blau (Naval Postgraduate School) *Measurements and Analysis of Ship-Induced Optical Turbulence on an Arleigh Burke Class Destroyer.* April 26, 2019.

Jeff Suzuki (Brooklyn College) *Patently Mathematical, or How I Lost a Billion Dollars in My Spare Time.* April 19, 2019.

Edward J. Marolda (Senior Historian, U.S. Navy (ret.)) *Admirals Under Fire: U.S. Naval Leaders and the Vietnam War.* April 12, 2019.

Dr. John P. Hussman (Hussman Institute for Autism) *The Neurobiology of Autism and Implications for Presuming Competence.* April 10, 2019.

Robert R. Leonhard (JHU/APL) *Fighting by Minutes: Time and the Art of War.* April 5, 2019.

Travis Gault and Jeffrey Dunne (JHU/APL) *The Impact of APL's Ongoing Support to US Navy Commander, Task Force 70 (CTF-70).* March 29, 2019.

Anna L. Buczak (JHU/APL) *Predicting the Future: IARPA Geopolitical Forecasting Challenge and Crystal Cube.* March 22, 2019.

Capt. James Howe (U.S. Coast Guard (ret.)) *Securing the Border: Lessons Learned From the Maritime War on Drugs.* March 15, 2019.

Bill Miller (CFA) *The Man Who Beat the Stock Market 15 Years in a Row.* March 14, 2019.

Sean McFate (NDU and Georgetown Univ.) *The New Rules of War.* March 8, 2019.

CPT Todd Howe (U.S. Army) *Thermodynamic Analysis of a Liquid Air Energy Storage System.* March 1, 2019.

Robert Lightfoot Jr. (NASA (ret.); President, LSINC Corp.) *Lessons Learned From Leading NASA.* February 22, 2019.

Antero Pietila (Author) *The Unknown Johns Hopkins – A Pragmatic Opportunist.* February 15, 2019.

The Honorable Catherine Pugh (Mayor of Baltimore) *Black History Month Keynote Address.* February 11, 2019.

Willie Padilla (Boston College) *Electromagnetic Metamaterials.* January 23, 2014.

Stamatios M. Krimigis (JHU/APL) *Voyager's Odyssey: From Earth to the Galaxy in Thirty-Five Years.* January 17, 2014.

Jeff J. S. Black (St. John's College) *Privacy, Ancient and Modern.* January 8, 2014.

Alfredo Quiñones-Hinojosa (Johns Hopkins Medical Institutions) *Engines of Brain Cancer Migration.* December 11, 2013.

Jerry Buckley, Margo Tank, and Steve Bisbee (BuckleySandler LLC and eOriginal) *Electronic Signatures and Records: The Intersection of Law and Technology.* December 6, 2013.

Paul Rosenzweig (Professorial Lecturer in Law, George Washington Univ. School of Law) *Cyber Warfare: The Economics, Policy, and Law of Cyber Conflict.* November 22, 2013.

Thomas Hazlett (George Mason Univ.) *The POLITICAL SPECTRUM: Regulators, Interest Groups, and the Struggle to Liberate Wireless Technologies of Freedom.* November 13, 2013.

Eric W. Boyle (National Museum of Health and Medicine) *From Quackery to Complementary Medicine: A History of Combating Alleged Health Fraud Since the Early 20th Century.* November 1, 2013.

Col. Timothy P. Alben (Massachusetts State Police) *MANAGING RISK: The Boston Marathon and Changing Security for Large Public Gatherings.* October 11, 2013.

2012 – 2013

Ignition Grants Winners (JHU/APL) *Ignition Grants Spring 2013 Edition.* August 16, 2013.

LTG Michael D. Barbero (U.S. Army Ret.; Former Director, Joint IED Defeat Organization) *The Global and Enduring IED Challenge.* July 19, 2013.

Nergis Mavalvala (Massachusetts Inst. of Technology) *Beyond the Quantum Limit in Gravitational Wave Detectors.* June 28, 2013.

Nader Engheta (Univ. of Pennsylvania) *Of Waves, Electrons, and Metamaterials.* June 21, 2013.

Capt. Michael Weiner (U.S. Navy, DoD/Veterans Affairs Interagency Program Office) *DoD Electronic Health Records.* June 3, 2013.

B. B. Rath (Naval Research Laboratory) *Energy After Oil.* May 31, 2013.

2013 Hart Prize Winners (JHU/APL) *The Hart Prizes for Excellence in Independent Research and Development.* May 17, 2013.

Kevin Kallaugher (The Economist) *From Pen to Pixel: Political Cartoons and the Future of Satire.* May 10, 2013.

Edward G. Amoroso (AT&T) *Reinventing Enterprise Network Security.* May 3, 2013.

Vinton G. Cerf (Google) *Re-Inventing the Internet.* April 29, 2013.

Carey M. Lisse (JHU/APL) *Prospects for Life and Human Habitability Around Nearby Stars: Many Possible Homes for Our Elder (?) Race, but the Neighbors Are Likely Bacteria.* April 26, 2013.

Vincent W. S. Chan (Massachusetts Inst. of Technology) *Optical Flow Switching.* April 23, 2013.

George Lucas (Naval Postgraduate School) *Legal and Ethical Precepts Guiding Research and Use of Emerging Military Technologies.* April 19, 2013.

Stephanie Hill (Lockheed Martin) *Information Technology Systems and Services and STEM.* February 22, 2013.

Jason Heikenfeld (Univ. of Cincinnati Novel Devices Laboratory) *Fluidic Devices for Tomorrow's Defense Applications: Displays, Electronics, Biosensors, and More ….* February 15, 2013.

John Boice (National Council on Radiation Protection and Measurements) *NCRP and the Study of a Million U.S. Radiation Workers and Veterans.* February 8, 2013.

Ignition Grants Winners (JHU/APL) *Ignition Grants Cycle 5 Colloquium.* January 24, 2013.

Jason Landrum (National Oceanic and Atmospheric Administration) *Federal Action to Reduce the Impacts of Marine Debris: Responses to Pervasive Problems and Natural Disaster Events.* January 18, 2013.

2012 Hart Prize Winners (JHU/APL) *The Hart Prizes for Excellence in Independent Research and Development.* November 30, 2012.

Norman Friedman (Defense Analyst) *UAVs in Strike Warfare.* November 9, 2012.

Polly Nayak (Independent Consultant) *India: Decision Making on External Security Issues.* November 2, 2012.

Ramon E. Lopez (Univ. of Texas at Arlington) *The Science of Space Weather.* October 19, 2012.

2011 – 2012

Ignition Grants Winners (JHU/APL) *JHU/APL STEM Ignition Grants.* September 28, 2012.

Soner Cagaptay (The Washington Institute) *Turkey's Foreign Policy Pivot.* September 20, 2012.

Dan Sievenpiper (Univ. of California, San Diego) *Artificial Impedance Surfaces: Passive, Active, and Nonlinear Periodic Structures for Controlling Electromagnetic Surface Currents.* August 24, 2012.

John Nagl (Center for a New American Security) *Learning to Eat Soup With a Knife: Counterinsurgency Lessons From Iraq and Afghanistan.* June 15, 2012.

Steven Chu (Secretary of Energy, 1997 Nobel Prize for Physics) *America's Role in Meeting the Energy Challenge.* June 1, 2012.

Maj. Joe Thomas and Marc A. Kolodner (U.S. Army and JHU/APL) *Signatures Exploitation in the Transshipment Zone.* May 18, 2012.

Robert Cahalan (NASA Goddard Space Flight Center) *Solar Irradiance and Climate – What's New? What's Next?* May 11, 2012.

Ignition Grants Winners (JHU/APL) *Ignition Grants Cycle 3 Colloquium.* May 4, 2012.

Mark T. Maybury (U.S. Air Force Chief Scientist) *Cyber Vision 2025: Air Force Cyber S&T Vision.* April 11, 2012.

David W. Orr (Oberlin College) *Twenty-First Century Sustainability, Resilience, and National Security.* April 6, 2012.

Scott M. Tyson (Author) *Pardon Me, but Your Paradoxes Are Showing!* March 30, 2012.

Barbara Slavin (Atlantic Council) *What Should We Do About Iran?* March 16, 2012.

Michael E. O'Hanlon (Brookings Institution) *Bending History?* March 9, 2012.

Vanda Felbab-Brown (Brookings Institution) *The Crime-Militancy Nexus: A Witch's Brew or a Myth?* March 2, 2012.

Ayanna Howard (Georgia Institute of Technology) *SnoMotes: Robotic Scientific Explorers for Understanding Climate Change.* February 17, 2012.

Rengaswamy Srinivasan (JHU/APL) *Advanced Lithium Batteries: One Way to Use, Many Ways to Abuse.* February 3, 2012.

Adam Riess (JHU Dept. of Physics and Astronomy and the Space Telescope Science Institute, 2011 Nobel Prize for Physics) *Dark Energy and the Cosmic Expansion History.* January 27, 2012.

Randolph L. Sullivan (Nuclear Regulatory Commission) *Overview of the Fukushima Daiichi Accident.* January 20, 2012.

Russell H. Taylor (JHU Dept. of Computer Science) *Medical Robotics and Computer-Integrated Interventional Medicine.* January 13, 2012.

Richard Gilly (Patent Attorney) *Weathering the Storm: Patents in the Cloud.* January 6, 2012.

2011 Hart Prize Winners (JHU/APL) *The Hart Prizes for Excellence in Independent Research and Development.* December 9, 2011.

W. P. Andrew Lee (JHU School of Medicine) *Immune Modulation for Hand Transplantation.* December 2, 2011.

Kelly Brunt (NASA GESTAR – Morgan State Univ.) *Antarctic Ice-Shelf Calving Triggered by the Japanese Earthquake and Tsunami, March 2011.* November 18, 2011.

Ignition Grants Winners (JHU/APL) *Ignition Grants Cycle 2 Colloquium.* November 4, 2011.

John R. Schmidt (George Washington Univ.) *The Unraveling: Pakistan in the Age of Jihad.* October 28, 2011.

Isaac Gertman (Israel Oceanographic and Limnological Research) *Amazing Interannual Variability of the Dead Sea Hydrological Regime.* October 21, 2011.

VADM Walter B. Massenburg (U.S. Navy Ret.; President, Association of Naval Aviation and Raytheon Integrated Defense Systems) *Centennial of Naval Aviation … the Next 100 Years?* October 14, 2011.

2010 – 2011

Carolina Cruz-Neira (Univ. of Louisiana at Lafayette) *A Digital Wonderland: Virtual Reality Applications for Everybody.* September 30, 2011.

Ignition Grants Winners (JHU/APL) *Ignition Grants Cycle 1 Colloquium.* June 17, 2011.

LCDR Mike Touse (Naval Postgraduate School) *Design, Fabrication, and Characterization of a Micromechanical Directional Microphone.* June 10, 2011.

Larry Robinson (National Oceanic and Atmospheric Administration) *Role of NOAA After the BP Deepwater Horizon Oil Spill.* June 3, 2011.

Rama Chellappa (Univ. of Maryland) *Compressive Sensing for Computer Vision.* May 24, 2011.

David Harriman (Author) *Do Scientists Need Philosophy?* May 13, 2011.

David Alberts (Office of the Assistant Secretary of Defense (Networks and Information Integration) and DoD Chief Information Officer) *The Agility Imperative.* April 22, 2011.

Joe Rosen (George Washington Univ.) *Other Universes.* April 15, 2011.

Dennis McCarthy (U.S. Naval Observatory) *Evolution of Timekeeping.* April 8, 2011.

Peter Pronovost (Johns Hopkins Medical Institutions) *Safe Patients, Smart Hospitals.* April 1, 2011.

Norman Polmar (Analyst) *Project Azorian: The CIA and the Raising of the K-129.* March 25, 2011.

Ren Cahoon (Archivist) *Gaping Holes in Our History: A Story of Impetuous Innovation.* March 18, 2011.

David E. Hoffman (Journalist) *Two Sides of Mikhail Gorbachev at the End of the Cold War: Decisions on Strategic Defenses and Biological Weapons, 1985-1991.* March 11, 2011.

Marvin W. Barrash (Author) *U.S.S. Cyclops – Lost Without a Trace.* March 4, 2011.

Darryll J. Pines (Univ. of Maryland) *Emerging Non-GPS Navigation Technology for Aerospace Systems.* February 25, 2011.

Bob Buus (Former Bell Labs) *The Forefathers of Radio.* February 18, 2011.

Richard Danzig (Former Secretary of the Navy) *Bioterrorism: How Should We Assess the Risk, and How Should We Prepare for It?* February 11, 2011.

Charles L. Bennett (JHU Dept. of Physics and Astronomy) *Big Bang for the Buck: Cosmology From WMAP.* January 14, 2011.

LCDR Robert Kerchner and Nancy M. Haegel (Naval Postgraduate School) *Vehicle Mounted Identification Friend or Foe (VMIFF): Leveraging Existing Targeting Systems for Fratricide Mitigation.* January 7, 2011.

Kathryn Flanagan (Space Telescope Science Institute) *The James Webb Space Telescope: We Can See the Beginning.* December 10, 2010.

2010 Hart Prize Winners (JHU/APL) *The Hart Prizes for Excellence in Independent Research and Development.* December 3, 2010.

Virginia W. Lunsford (United States Naval Academy) *The War Against Piracy: The Golden Age and Now.* November 19, 2010.

Michael Greenberger (Univ. of Maryland) *Our Economic Insecurity and Its Relationship to the Overall Security of the Nation.* November 12, 2010.

Rob Randell (VMware) *Architecting and Building a Secure Virtual Infrastructure and Private Cloud.* November 5, 2010.

Peter Volkovitsky (National Institute of Standards and Technology) *History of the Soviet Nuclear Weapon Project.* October 29, 2010.

Jonathan Pevsner (Kennedy Krieger Institute) *The Mind of Leonardo Da Vinci.* October 15, 2010.

Marc A. Kolodner (JHU/APL) *APL Signatures Exploitation Program.* October 8, 2010.

2009 – 2010

Patricia P. Driscoll (Frontline Defense Systems) *The Art of the Possible.* September 23, 2010.

Christos Bolakis and Gamani Karunasiri (Naval Postgraduate School) *MEMS Based Sensors for THz Imaging.* June 3, 2010.

Naim Merheb (JHU/APL) *Doing APL Stuff in Baghdad.* May 26, 2010.

Peter J. McDonnell (JHU Wilmer Eye Institute) *The Wilmer Eye Institute and Health Care Reform.* May 21, 2010.

Michael Berman (Catbird) *Security, Protection, and Compliance for Virtual Infrastructure (And the Cloud) – Building Security Into the Fabric.* May 14, 2010.

Jin U. Kang (JHU Dept. of Electrical and Computer Engineering) *Photonics Applications: Past, Present, and Future.* May 7, 2010.

Deborah Elam (General Electric Company) *Leadership: Transforming Diversity Into Inclusion.* April 23, 2010.

Hrvoje Jasak (Univ. of Zagreb) *OpenFOAM: Object-Oriented Software in Computational Continuum Mechanics.* April 16, 2010.

Howard Cox (U.S. Department of Justice) *Cybercrime Trends 2010.* April 9, 2010.

Joel S. Wit (JHU School of Advanced International Studies) *Will North Korea Give Up Its Nuclear Weapons?* April 2, 2010.

Richard Howard (Verisign iDefense) *2010 Cyber Threats and Trends.* March 26, 2010.

Joshua Epstein (Brookings Institution) *Agent-Based Computational Modeling in Public Health: From Playground to Planet.* March 19, 2010.

Stephen C. Schimpff (Univ. of Maryland Medical Center) *The Future of Medicine – Megatrends in Medical Science and in Healthcare Delivery.* March 12, 2010.

Ronald Marcell (Immigration and Customs Enforcement) *Undercover Operations in Counter-Proliferation Investigations.* March 5, 2010.

Joseph S. Francisco (President, American Chemical Society) *Chemistry and Its Role in National Security and the STEM Challenge.* February 25, 2010.

Martin Murphy (Center for Strategic and Budgetary Assessments) *Somali Piracy: The Implications for International Security.* February 19, 2010.

RADM David Titley (Oceanographer and Navigator of the Navy) *The U.S. Navy's Task Force on Climate Change.* January 29, 2010.

Jeffrey S. Bardin (ITSolutions) *Extremist Jihadi Social Networks.* January 22, 2010.

Scott Pace (George Washington Univ.) *International Opportunities and Challenges for U.S. Space Policy.* December 11, 2009.

2009 Hart Prize Winners (JHU/APL) *The Hart Prizes for Excellence in Independent Research and Development.* December 1, 2009.

Roger D. Launius (National Air and Space Museum) *Perspectives on the Past, Present, and Future of Human Spaceflight.* November 20, 2009.

LTG James A. Abrahamson (U.S. Air Force Ret., former director of the Strategic Defense Initiative Organization) *The Strategic Defense Initiative, JHU/APL, and the Cold War.* November 13, 2009.

Brad Parkinson (Stanford Univ.) *The Origins of GPS and the Role of APL in the Technology.* October 27, 2009.

George F. Riley (Georgia Institute of Technology) *Network Simulation With NS3.* October 23, 2009.

Nirdhar Khazanie (Northrop Grumman) *Information Sharing Behind Firewalls.* October 16, 2009.

2008 – 2009

Capt. Mark B. Lyles (U.S. Navy Bureau of Medicine and Surgery) *Medical Geology: Dust Exposure and Potential Health Risks in the Middle East.* September 25, 2009.

RADM Jay A. DeLoach (U.S. Navy Ret., Naval History and Heritage Command) *Hispanic Americans in American Naval History.* September 18, 2009.

Joseph D'Aleo (Meteorologist) *Climate Change.* June 11, 2009.

Michael C. MacCracken (Climate Institute) *Climate Change – A Challenge We Must Address.* June 5, 2009.

Richard Talbott (JHU/APL) *Information Assurance Lessons From the Past, WWII, and Today.* May 29, 2009.

Martin P. Harmer (Lehigh Univ.) *Complexions: New States of Matter at Interfaces.* May 22, 2009.

Kal Shastri (Lightwire) *Journey of a Physicist in the Engineering World.* May 15, 2009.

Waleed Abdalati (Univ. of Colorado, Cooperative Institute for Research in Environmental Sciences) *Dramatic Changes in Polar Ice: Are We Waking Sleeping Giants?* May 8, 2009.

George Helfrich (JHU/APL Ret.) *APL and the U.S. Navy in the Deserts of New Mexico.* April 24, 2009.

Ned Tillman (Growth Adventures) *The Chesapeake Watershed – Past, Present, and Future.* April 17, 2009.

Charles Seife (New York Univ.) *Fusion, Politics, and the Press.* April 10, 2009.

Marcus Jones (U.S. Naval Academy) *U.S. Strategic Bombing in Doctrine and Practice in World War II: The Case of the European Theater.* April 3, 2009.

James C. M. Hwang (Lehigh Univ.) *RF MEMS Technology for Space Applications.* March 27, 2009.

Giles Dorronsoro (Carnegie Endowment for International Peace) *Focus and Exit: An Alternative Strategy for the Afghan War.* March 13, 2009.

Sudip Bose (Advocate Christ Medical Center) *On Call in Iraq.* March 6, 2009.

Reuben Pitts (NSWC Dahlgren Ret.) *The U.S.S. Vincennes Incident – The Data.* February 27, 2009.

Slava Rotkin (Lehigh Univ.) *Transistor Channels "Flying" a Few Nanometers Above the Surface: Novel Physics of "Empty" Space.* February 20, 2009.

Denise Gray (General Motors Engineering) *Reinventing GM and the Automobile: From Batteries to Sustainability.* February 13, 2009.

Erik van Ommeren (Sogeti U.S.A. LLC) *Me the Media: Rise of the Conversation Society.* February 6, 2009.

Steven Brams (New York Univ.) *Mathematics and Democracy: Designing Better Voting and Fair-Division Procedures.* January 30, 2009.

James Van Allen (JHU/APL and Univ. of Iowa) *The Pioneer 10 Encounters Jupiter.* February 8, 1974.

Owen M. Phillips (Johns Hopkins Univ.) *Breaking Waves and Ocean White Caps.* February 1, 1974.

D. M. Gilford (National Academy of Sciences) *Can a Statistician Influence Policy in American Education?* January 25, 1974.

P. O. Clark (Hughes Research Labs) *Recent Developments in Laser Technology.* January 18, 1974.

H. D. Mills (IBM Federal Systems) *Math as Structured Programming or How to Cut the Gordian Knot.* January 11, 1974.

Irving S. Cooper (St. Barnabas Hospital) *The Present and Potential Use of a Brain Pacemaker.* December 21, 1973.

K. B. Lewis (Johns Hopkins Univ.) *The Nature of Heart Disease.* December 14, 1973.

Donn B. Parker (Control Data Corp.) *Computer Abuse.* December 7, 1973.

E. S. Starkman (General Motors Corp. and Univ. of California) *The Automobile and the Environment in an Era of Conflicting Demands.* November 30, 1973.

A. D. Moore (Univ. of Michigan) *Electrostatics in Action.* November 16, 1973.

Christopher H. Scholz (Columbia Univ.) *The Physics of Earthquakes and Earthquake Prediction.* November 9, 1973.

A. F. Aveni (Colgate Univ. and Univ. of South Florida) *Astronomy and City Planning in Ancient Mexico.* November 2, 1973.

G. E. Smith (Bell Telephone Laboratories) *An Overview of Charge Coupled Devices.* October 26, 1973.

T. S. Huang (Purdue Univ.) *Image Enhancement by Computer.* October 19, 1973.

T. O. Poehler (JHU/APL) *High Temperature Superconductivity?* October 12, 1973.

1972 – 1973

Robert E. Fischell (JHU/APL) *A Rechargeable Heart Pacemaker: Evolution of a 'Better Mouse Trap.'* May 25, 1973.

Carl E. Fichtel (NASA Goddard Space Flight Center) *Gamma-Ray Astronomy From SAS-2.* May 18, 1973.

Abraham J. Sachs (Brown Univ.) *Deciphering Babylonian Astronomy.* May 11, 1973.

W. A. Fisher (U.S. Geological Survey) *Earth Resources From Satellites: ERTS and EROS.* May 4, 1973.

Betty Vetter (Scientific Manpower Commission) *How Many Engineers (Or Scientists) Are Enough?* April 27, 1973.

S. I. Rasool (National Aeronautics and Space Administration) *Atmospheres of Mars, Venus, and Earth - A Problem in Atmospheric Evolution.* April 20, 1973.

Peter Parker (Yale Univ.) *The Solar Neutrino Puzzle.* April 6, 1973.

S. Fred Singer (Univ. of Virginia) *When Does Growth Become Too Expensive?* March 23, 1973.

Julian Stanley (Johns Hopkins Univ.) *Mathematically Precocious Youngsters.* March 16, 1973.

Joseph Weber (Univ. of Maryland) *The Gravitational Radiation Experiment.* March 9, 1973.

Estelle Ramey (Georgetown Univ.) *Sex Differences From the Physiological Point of View: Facts and Fiction.* February 23, 1973.

D. J. Williams (NOAA) *Impact of Space Disturbances on Man's Immediate Environment.* February 16, 1973.

Arnall Patz (JHU School of Medicine) *Photocoagulation With a Special-Purpose Laser.* February 9, 1973.

H. F. Harmuth (The Catholic Univ. of America) *Survey of R&D in the Field of Walsh Functions.* February 2, 1973.

M. L. Hill (JHU/APL) *Use of Atmospheric Electricity for Aircraft Stabilization.* January 26, 1973.

R. C. Elton (Naval Research Laboratory) *Recent Developments in X-Ray Lasers at NRL.* January 19, 1973.

M. H. Cohen (Univ. of Chicago) *Control of Biological Development in a Simple Living Organism.* January 12, 1973.

D. W. Pritchard (Johns Hopkins Univ.) *The Effect of Hurricane Agnes on the Chesapeake Bay.* December 15, 1972.

G. H. Brown (Kent State Univ.) *The Properties and Structure of Liquid Crystals.* December 8, 1972.

Carrol M. Williams (Harvard Univ.) *New Approaches to the Selective Control of Insect Pests.* December 1, 1972.

J. Tuzo Wilson (Univ. of Toronto) *The Physical Study of Earth and the Scientific Revolution It Has Caused.* November 17, 1972.

Oskar Morgenstern (New York Univ.) *A Cost/Benefit Analysis of the Space Shuttle.* November 10, 1972.

Robert Ardrey (Author) *The Biology of Behavior.* November 3, 1972.

C. K. Jen (JHU/APL) *My Impressions of Science and Technology in China.* October 27, 1972.

Max V. Mathews (Bell Telephone Laboratories) *Computer Music and Other Unusual Computer Applications.* October 20, 1972.

Robert E. Fischell (JHU/APL) *Triad – A 4-Ounce Satellite in a 200 Pound Box.* October 13, 1972.

John H. Nuckolls and Lowell Wood (Lawrence Livermore Laboratory) *Laser Fusion.* October 6, 1972.

1971 – 1972

M. Olson (Univ. of Maryland) *The National Income and the Quality of Life.* June 2, 1972.

Alexander Marshack (Harvard Univ.) *Early Ice-Ace Intelligence as Revealed by Notation and Art.* May 19, 1972.

Joseph Smogarinsky (NOAA Geophysical Fluid Dynamics Laboratory) *The Global Atmospheric Circulation.* May 5, 1972.

Theodor Hansch (Stanford Univ., 2005 Nobel Prize for Physics) *Saturation Spectroscopy With Tunable Dye Lasers.* April 28, 1972.

Richard A. Farrell (JHU/APL) *Transparency and Structure of the Cornea.* April 21, 1972.

Remo Ruffini (Princeton Univ.) *Black Holes in Our Galaxy.* April 14, 1972.

W. K. Hartmann (Illinois Inst. of Technology) *Early Cratering History of the Solar System.* April 7, 1972.

Roger F. Naill (Massachusetts Inst. of Technology) *A Systems Dynamics Study of Nonrenewable Natural Resources.* March 31, 1972.

Leo P. Kadanoff (Brown Univ.) *Uses and Misuses of Urban Growth Models.* March 24, 1972.

Clifford S. Russell, Walter O. Spofford, and Robert A. Kelly (Resources of the Future) *Regional Environmental Quality Monitoring.* March 17, 1972.

R. Langridge (Princeton Univ.) *Interactive Computer Graphics in Molecular Biology.* March 10, 1972.

Harold Schonhorn (Bell Telephone Laboratories) *Surface Chemistry and Practical Adhesion.* February 25, 1972.

Samuel Rosen (Mt. Sinai Hospital Medical School) *A Physician's Report on His Visit to China.* February 18, 1972.

Jesse W. Beams (Univ. of Virginia) *The Measurement of the Gravitational Constant.* February 11, 1972.

Armand H. Delsemme (Univ. of Toledo) *Our Understanding of the Cometary Phenomena.* February 4, 1972.

M. Gordon Wolman (Johns Hopkins Univ.) *Is the World Livable?* January 28, 1972.

William Sladen (Johns Hopkins Univ.) *Adélie Penguins and Whistling Swans: A Study of Gregarious Individuals.* January 14, 1972.

C. Kumar N. Patel (Bell Telephone Laboratories) *Tunable Raman Lasers.* January 7, 1972.

Timothy Williams and Janet Williams (State Univ. of New York) *Tracking Radar Studies of Bird Migrations.* December 17, 1971.

Donald Mitz (NASA Headquarters) *NASA's Planetary Program.* December 10, 1971.

S. Fred Singer (Univ. of Virginia) *Is There an Optimum Level of Population?* December 3, 1971.

James S. Coleman (Johns Hopkins Univ.) *Entry of the Young Into Adult Society.* November 19, 1971.

Milton Moon (JHU/APL) *Some Alternatives for Air Traffic Control.* November 12, 1971.

Stuart W. Churchill (Univ. of Pennsylvania) *Choosing Between Theory and Experiment.* November 5, 1971.

John C. Kohl (Commissioner of Transportation of New Jersey) *Urban Transit and Institutional Inertia.* October 29, 1971.

Henry M. Seidel (Johns Hopkins Univ.) *The 'Overselling' of the Physician.* October 22, 1971.

Louis S. B. Leakey (Center for Prehistory and Paleontology) *Man: Past, Present – Future?* October 8, 1971.

1970 – 1971

R. Conrad (Medical Research Council) *Why We Talk to Ourselves When We Read.* May 21, 1971.

David Rabenhorst (JHU/APL) *The Superflywheel.* May 14, 1971.

John Calhoun and Leonard Olson (National Inst. of Mental Health) *Social Physics of Experimental Animal Populations.* May 7, 1971.

George F. Pieper (NASA Goddard Space Flight Center) *Priorities for Space Research in the 1970s.* April 30, 1971.

Herbert Gursky (Naval Research Laboratory) *X-Ray Astronomical Observations From SAS-A.* April 16, 1971.

Athelstan F. Spilhaus (American Association for the Advancement of Science) *Toward a Steady World.* April 9, 1971.

Albert Owens (Johns Hopkins Univ.) *Acute Leukemia: Investigative Challenges.* April 2, 1971.

Leon M. Lederman (Columbia Univ., 1988 Nobel Prize for Physics) *Elementary Particles: Speculation and Fantasy.* March 26, 1971.

Alexander M. Letov (Inst. for Control Problems) *A Survey of Soviet Spacecraft.* March 22, 1971.

Max Singer (Hudson Inst.) *Drug Abuse Policy.* March 12, 1971.

P. K. Tien (Bell Telephone Laboratories) *Light Waves in Thin Films and Integrated Micro-Optics.* February 19, 1971.

M. S. Eisenhower (Johns Hopkins Univ.) *To Insure Domestic Tranquility.* February 12, 1971.

Joseph Weber (Univ. of Maryland, College Park) *The Gravitational Radiation Experiment.* February 5, 1971.

David M. Gates (Washington Univ. and Missouri Botanical Gardens) *Energy Exchange With the Environment of Plants and Animals.* January 29, 1971.

Norman A. Blum (JHU/APL) *The Mossbauer Effect in High Magnetic Fields.* January 22, 1971.

Tsu Kai Chu (Princeton Univ.) *Feedback and Dynamic Control of Plasma Instabilities.* January 15, 1971.

Maurice M. Shapiro (Naval Research Laboratory) *Galactic Confinement of Cosmic Rays.* January 8, 1971.

Chung-ming Wong (U.S. Dept. of Interior) *Environmental Survival: A New Challenge for Engineers and Scientists.* December 18, 1970.

Charles Blake (Federal Aviation Administration) *SST Program Rationale and Status.* December 11, 1970.

Robert H. Cannon (U.S. Dept. of Transportation) *Some Advanced Transportation Programs.* December 4, 1970.

Joseph Schiebel (Georgetown Univ.) *The Soviet Scientist and Dissent.* November 27, 1970.

Morton B. Panish (Bell Telephone Laboratories) *The Evolution of a Room-Temperature CW Junction Laser.* November 20, 1970.

Lewis T. Claiborne (Texas Instrument Company) *Application of Ultrasonic Surface Waves to Signal Processing.* November 13, 1970.

Arthur Squires (City Univ. of New York) *Clean Power From Coal.* October 30, 1970.

Walter Elsasser (Univ. of Maryland) *Solid Geophysics: From Sea Floor Spreading to Mountain Building.* October 16, 1970.

Lauren Rueger (JHU/APL) *Time and Frequency Standardization.* October 9, 1970.

1969 – 1970

Robert A. Makofski (JHU/APL) *Technical and Economic Evaluation of Urban Transportation Systems.* May 15, 1970.

J. Murray Mitchell (ESSA Research Laboratories) *Air Pollution and Global Climatic Change.* May 8, 1970.

Thomas Collins (National Accelerator Laboratory) *The Present Status and Future Plans of the National Accelerator Laboratory (N.A.L.).* May 1, 1970.

Stanislaw Ulam (Univ. of Colorado) *Some Unusual Uses of Computers and Computing.* April 24, 1970.

Irwin Shapiro (Massachusetts Inst. of Technology) *Radio and Radar Tests of General Relativity.* April 17, 1970.

Joseph Tydings (Senate) *Crime, Judicial Reform, and Urban Problems.* April 10, 1970.

William Paddock (Tropical Agriculture Development) *How Green Is the 'Green' Revolution?* April 3, 1970.

Hannes Alfvén (Univ. of California San Diego, 1970 Nobel Prize for Physics) *Mission to an Asteroid.* March 26, 1970.

Leo Goldberg (Harvard Univ.) *Maser Effects in the Interstellar Medium.* March 20, 1970.

L. Eugene Cronin (Univ. of Maryland) *The Chesapeake at Bay.* March 13, 1970.

Robert R. Stromberg (National Bureau of Standards) *Polywater.* March 6, 1970.

Robert H. Kargon (Johns Hopkins Univ.) *Science's Public Malaise.* February 27, 1970.

Terrill A. Cool (Cornell Univ.) *Continuous-Wave All-Chemical Lasers.* February 20, 1970.

M. King Hubbert (U.S. Geological Survey) *Physical Constraints in the Evolution of an Industrial Culture.* February 13, 1970.

R. E. Rosensweig (Ferrofluidics Corporation) *Magnetic Fluid Technology.* February 6, 1970.

Simon Foner (MIT Lincoln Laboratory) *High Field Magnetism and Some Applications.* January 30, 1970.

M. Liebenberg (Dept. of Commerce) *The Office of Business Economics (O.B.E.) Quarterly Econometric Model of the U.S. Economy.* January 23, 1970.

A. F. Haught (United Aircraft Research Laboratories) *Laser Produced Plasmas.* January 16, 1970.

Albert Crewe (Univ. of Chicago) *High-Resolution Scanning Electron Microscopy.* December 12, 1969.

R. C. Powell (U.S. Coast Guard) *The Tanker Manhattan Through the Northwest Passage.* December 5, 1969.

Samuel E. Clements (Dept. of Defense) *Department of Defense R&D Policy.* November 21, 1969.

Stephen P. Maran (National Aeronautics and Space Administration) *Pulsars and the Crab Nebula.* November 14, 1969.

Carroll Alley (Univ. of Maryland) *The Apollo 11 Laser Ranging Retro-Reflection Experiment.* November 7, 1969.

Lawrence Goldmuntz (U.S. Dept. of Transportation) *A Proposed Solution for Air Traffic Control.* October 31, 1969.

Derrick Scovil (Bell Telephone Laboratories) *Magnetic Bubbles.* October 24, 1969.

Edward C. T. Chao (U.S. Geological Survey) *Preliminary Results of Apollo 11 Lunar Samples.* October 17, 1969.

Edward C. Smith (American Univ. and JHU/APL) *Urban Tribalization in Washington DC: A Study of Invisible Political Power.* October 10, 1969.

1968 – 1969

E. S. Starkman (Univ. of California Berkeley) *Control of Vehicular Emissions: Methods and Limitations.* May 29, 1969.

Margaret Mead (American Museum of Natural History) *Cultural Factors and Population Control.* May 23, 1969.

Woodrow Seamone (JHU/APL) *The Man-Machine Interface in the Use of Artificial Hands.* May 16, 1969.

Peter G. Fielding (Booz Allen Research) *The Status of Surface-Effect Vehicles.* May 9, 1969.

Raymond J. Seeger (National Science Foundation) *Nature, Art, and Mathematics.* May 2, 1969.

John S. Rinehart (ESSA Research Laboratories) *Why Geysers Are Faithful.* April 25, 1969.

Louis Flexner (Univ. of Pennsylvania) *Memory.* April 18, 1969.

Martin A. Uman (Westinghouse Research and Development) *Lightning.* April 11, 1969.

Hellmut Fritzsche (Univ. of Chicago) *Amorphous Semiconductors, New Physics, and a New Technology.* March 28, 1969.

Harold Hoekstra (Federal Aviation Administration) *Hijacking.* March 21, 1969.

Ernest Stern (Massachusetts Inst. of Technology) *Progress Report on Micro-Sound Technology.* March 14, 1969.

Reid A. Bryson (Univ. of Wisconsin Center for Climatic Research) *Effects of Atmospheric Pollution on Climate.* March 7, 1969.

J. Lamar Worzel (Columbia Univ. Lamont Geological Observatory) *Are the Continents Drifting?* February 28, 1969.

William S. Albright (Johns Hopkins Univ.) *How One Reconstructs an Ancient Civilization.* February 14, 1969.

C. A. Doxiadis (Doxiadis Associates, Athens, Greece) *An Open-Ended Discussion on Human Settlements.* February 7, 1969.

John L. Colp (Sandia Laboratories) *Terradynamics.* January 31, 1969.

Anthony J. DeMaria (United Aircraft Research Laboratories) *Ultra-Short Laser Pulses.* January 24, 1969.

Frank White (Aviation Transport Association) *Airborne Collision-Avoidance Technology.* January 17, 1969.

John P. Craven (Dept. of the Navy) *Design of Small Submersibles.* January 10, 1969.

John B. Garrison, D. G. Grant, M. M. Hart, and Woodrow Seamone (JHU/APL) *Topics Selected From APL's Medical Engineering Activities.* December 13, 1968.

Philip Abelson (Carnegie Geophysical Laboratory) *Science and Politics 1969; The Road Bends Sharply.* December 6, 1968.

Peter H. Rossi (Johns Hopkins Univ.) *Civil Disorders and the Politics of Discontent.* November 22, 1968.

S. Fred Singer (U.S. Dept. of Interior) *Origin of the Moon and Geophysical Consequences.* November 15, 1968.

L. M. Murphy (Environmental Science Service Administration) *The Mechanisms of Earthquakes.* November 8, 1968.

Holbrook MacNeille (Case Inst. of Technology) *Experimental Films in Mathematics Teaching.* November 20, 1964.

Phillip Converse (Univ. of Michigan) *Elections and Opinion Polls.* November 13, 1964.

Wilmot Hess (NASA Goddard Space Flight Center) *Origins of Protons in the Outer Radiation Zone.* November 6, 1964.

Gordon Lill (National Science Foundation) *Project Mohole.* October 30, 1964.

Sidney Metzger (Communications Satellite Corporation) *Technical Program of the Communications Satellite Corporation.* October 23, 1964.

Stanley Donald Stookey (Corning Glass Corporation) *Photochromic Glasses.* October 16, 1964.

Joseph F. Bird (JHU/APL) *Star Formation.* October 9, 1964.

1963 – 1964

P. E. James (Syracuse Univ.) *New Viewpoints on Geography and National Power.* May 27, 1964.

Carl O. Bostrom (JHU/APL) *Results of Particle Measurements From APL Satellites.* May 22, 1964.

S. Goldblith (Massachusetts Inst. of Technology) *Radiation Preservation of Foods – Present Status and Future Prophecy.* May 15, 1964.

H. Guerlac (Cornell Univ.) *New Light on Newton's Optics.* May 8, 1964.

P. Morrison (Cornell Univ. and Massachusetts Inst. of Technology) *Cosmic X-Rays and Gamma Rays.* May 1, 1964.

R. W. Hamming (Bell Telephone Laboratories) *Chebyshev Approximation – The Minimax Criterion as an Alternative to Least Squares.* April 24, 1964.

Jesse W. Beams (Univ. of Virginia) *Some Experiments With High Constant-Speed Rotors.* April 10, 1964.

R. E. Behrends (Yeshiva Univ.) *New Insight Into Elementary Particles – The Eightfold Way.* April 3, 1964.

Abraham Bers (Massachusetts Inst. of Technology) *The Nature of Stable and Unstable Waves in Plasmas and Other Dispersive Media.* March 20, 1964.

Donald Pritchard (Johns Hopkins Univ.) *Research and Education in Oceanography at the Johns Hopkins University.* March 13, 1964.

Alexander Flax (Dept. of Defense) *Panel Flutter – Classical Small-Oscillation Theory Revisited.* March 6, 1964.

Lindsey Harmon (National Academy of Sciences) *Trends and Issues in Scientific Manpower Production.* February 28, 1964.

Samuel N. Alexander (National Bureau of Standards) *Where Are the Frontiers of Information and Data Processing Today?* February 21, 1964.

Aristide V. Grosse (Temple Univ.) *Noble Gas Compounds.* February 14, 1964.

Paul D. Maker (Ford Motor Company) *Some Experiments in Nonlinear Optics.* February 7, 1964.

H. C. Eagle (Albert Einstein Medical School) *Experimental Application of Cultured Animal Cells.* January 31, 1964.

Carleen Hutchins (Acoustician and Violinmaker) *The Physics of Violins – With Musical Illustrations.* January 17, 1964.

W. E. Danielson (Bell Telephone Laboratories) *Problems in Ballistic Missile Defense.* January 10, 1964.

S. Fred Singer (Univ. of Maryland and U.S. Weather Bureau) *Weather Satellites.* January 3, 1964.

Ali Javan (Massachusetts Inst. of Technology) *Application of the Gaseous Laser to Precision Measurements.* December 13, 1963.

Max A. Butterfield (U.S. Post Office) *Problems in Handling Large Volumes of Mail.* December 6, 1963.

M. S. Eisenhower (Johns Hopkins Univ.) *Latin America on the Verge of Revolution.* November 15, 1963.

M. Kac (Rockefeller Inst.) *The Statistical Mechanics of Some One-Dimensional Systems.* November 1, 1963.

R. C. Oldfield (Oxford Univ.) *Memory and the Theory of Schema.* October 30, 1963.

John B. Fenn (Princeton Univ., 2002 Nobel Prize for Chemistry) *High-Intensity Molecular Beams.* October 25, 1963.

T. R. Carver (Princeton Univ.) *Optical Pumping and Atomic Clocks.* October 18, 1963.

A. C. Pearce (Bell Comm) *Physics on the Moon.* October 11, 1963.

Robert R. Newton (JHU/APL) *The Shape of the Earth.* October 4, 1963.

1962 – 1963

C. Meyer (JHU/APL) *Evaluation of Surface-to-Air Missile Systems.* May 24, 1963.

H. S. M. Coxeter (Univ. of Toronto) *The Mathematics of Map Coloring.* May 17, 1963.

F. Press (California Inst. of Technology) *Recent Developments in Seismology.* May 14, 1963.

N. H. Frank (Massachusetts Inst. of Technology) *A New Look at the Teaching of College Physics.* May 3, 1963.

G. Rado (Naval Research Laboratory) *Magnetoelectric Effects in Antiferromagnets.* April 12, 1963.

M. Baranger (Carnegie Inst. of Technology) *Recent Work on Nuclear Structures.* April 5, 1963.

J. Blewett (Brookhaven National Laboratory) *Design Studies for 300 to 1000 BeV Accelerators and the Future of Large Accelerators.* March 22, 1963.

T. Litovitz (Catholic Univ.) *Ultrasonic Spectroscopy in Liquids.* March 15, 1963.

J. Ragazzini (New York Univ.) *Sampled Data Systems.* March 8, 1963.

Herman F. Mark (Brooklyn Polytechnic Inst.) *New Events in the Physics of Polymers.* March 1, 1963.

G. Leichner (Univ. of Illinois) *Use of Digital Computers for Circuit Design.* February 15, 1963.

Conway Snyder (Jet Propulsion Laboratory) *Results From the Mariner II Spacecraft.* February 14, 1963.

S. K. Friedlander and S. H. Talbot (Johns Hopkins Univ.) *Topics in Biomedical Engineering.* February 8, 1963.

W. L. Brown (Bell Telephone Laboratories) *Recent Observations of the Artificial Radiation Belts.* January 18, 1963.

T. Reynolds (St. Elizabeth's Hospital) *A Research Program in a Mental Hospital.* January 11, 1963.

W. Tantraporn (General Electric) *Thin-Film Active Elements for Use in Microelectronics.* January 4, 1963.

Leon M. Lederman (Columbia Univ., 1988 Nobel Prize for Physics) *Experiments With High-Energy Neutrinos.* December 7, 1962.

H. Margenau (Yale Univ.) *The Quantum Theory of Measurement.* November 30, 1962.

G. F. Carrier (Harvard Univ.) *On the Wind-Driven Ocean Circulation.* November 16, 1962.

D. B. Beard (Univ. of California) *Microwave Emission From Jupiter.* November 9, 1962.

E. M. Pugh (Carnegie Institute of Technology) *Fundamental Principles in the Projection and Impact Phenomena of High Speed Pellets.* November 2, 1962.

E. J. Sternglass (Westinghouse Research) *Classical Models of the Elementary Particles.* October 26, 1962.

W. L. Faust (Bell Telephone Laboratories) *Some Recent Experiments With Gaseous Optical Masers.* October 19, 1962.

R. R. Nelson (President's Council of Economic Advisors) *Scientific Research and Economic Growth: Some Problems of Public Policy.* October 12, 1962.

L. J. Rueger (JHU/APL) *Time and Frequency Standards for the Transit Satellite Program.* October 5, 1962.

1961 – 1962

G. F. Pieper (JHU/APL) *Research Results From the Injun and TRAAC Satellites.* May 25, 1962.

L. M. Branscomb (National Bureau of Standards) *The Structure and Spectra of Negative Atomic Ions.* May 18, 1962.

D. L. Allen (Purdue Univ.) *Studies on the Population Balance Between Moose and Wolves on Isle Royale.* May 11, 1962.

S. Bhagavantam (Indian Inst. of Science) *Crystal Symmetry and Physical Properties.* May 4, 1962.

V. L. Telegdi (Univ. of Chicago) *Present Problems of Muon Physics.* April 27, 1962.

Manfred R. Schroeder (Bell Telephone Laboratories) *Artificial Reverbation, Pseudostereophony, and the Digital Simulation of Concert-Hall Acoustics.* April 20, 1962.

T. Fulton (Johns Hopkins Univ.) *Classical Radiation From Uniformly-Accelerated Electrons.* April 6, 1962.

W. B. Fowler (Brookhaven National Laboratory) *Bubble Chamber Physics at the Brookhaven National Laboratory.* March 30, 1962.

R. Ferrell (Univ. of Maryland) *Collective Oscillations of Normal and Superconducting Electrons.* March 23, 1962.

S. Mason (Massachusetts Inst. of Technology) *Sensory Communication for the Blind.* March 16, 1962.

J. Charney (Massachusetts Inst. of Technology) *Some Problems in the Dynamics of Planetary Atmospheres.* March 9, 1962.

R. P. Hudson (National Bureau of Standards) *Some Experiments on Spin-Lattice Relaxation in Rare-Earth Salts.* March 2, 1962.

C. P. Sonett (NASA) *Magnetic Disturbances in the Far Exosphere.* February 23, 1962.

M. Nirenberg (National Institutes of Health, 1968 Nobel Prize for Physiology/Medicine) *Progress Toward Breaking the Genetic Code.* February 16, 1962.

R. L. Bisplinghoff (Massachusetts Inst. of Technology) *Current Problems in Aero-Thermoelasticity.* January 19, 1962.

J. E. Kunzler (Bell Telephone Laboratories) *High-Field Superconductivity and Superconducting Magnets.* January 12, 1962.

Philip Abelson (Carnegie Geophysical Laboratory) *Current Research Relevant to the Origin of Life.* January 5, 1962.

F. J. Weyl (Office of Naval Research) *A Mathematician Looks at Memory.* December 15, 1961.

D. K. Wessel (Syracuse Univ.) *Some Recent Developments in Optical and Infrared Masers.* December 8, 1961.

G. Feldman (Johns Hopkins Univ.) *The Structure of the Nucleon in New Elementary Particles.* December 1, 1961.

David J. Rose (Massachusetts Inst. of Technology) *Some Recent Advances and Future Prospects in Controlled Thermonuclear Fusion.* November 24, 1961.

P. J. Debye (Cornell Univ., 1936 Nobel Prize for Chemistry) *Critical Opalescence and Molecular Interactions.* November 17, 1961.

E. L. O'Neil (Boston Univ.) *Modern Developments in Optics and Communications.* November 10, 1961.

John C. Lilly (Communications Research Institute) *Communications by Dolphins.* November 3, 1961.

S. Fritz (U.S. Weather Bureau) *The TIROS Meteorological Satellite.* October 27, 1961.

G. E. Kimball (A.D. Little Co.) *Unsolved Problems in Production Scheduling.* October 13, 1961.

R. P. Rich (JHU/APL) *Computer Trends.* October 6, 1961.

1960 – 1961

J. Caldwell (Beach Erosion Board) *Shore Processes and Coastal Engineering.* May 19, 1961.

T. Gold (Cornell Univ.) *Processes on the Lunar Surface.* May 12, 1961.

E. Burstein (Univ. of Pennsylvania) *Investigation of Excited Carriers in Superconductors.* May 5, 1961.

R. Strause-Hupe (Univ. of Pennsylvania) *Strategy and Value.* April 14, 1961.

O. Selfridge (MIT Lincoln Laboratory) *Discussion of Problems Associated With Machine Learning.* April 7, 1961.

J. W. Carr III (Univ. of North Carolina) *Computer Programming and Theorem Proving.* March 24, 1961.

G. W. Stroke (Massachusetts Inst. of Technology) *Recent Developments in Large Diffraction Gratings.* March 17, 1961.

M. Camac (AVCO Research Labs) *Plasma Propulsion.* March 10, 1961.

Harrison Brown (California Inst. of Technology) *Resources and the Future of Industrial Civilization.* March 3, 1961.

W. F. G. Swann (Bartol Foundation) *Relativity and the Twin Paradox.* February 24, 1961.

A. J. F. Siegert (Northwestern Univ.) *Theory of Random Functions With Applications to Noise in Radio.* February 17, 1961.

N. F. Ramsey (Harvard Univ., 1989 Nobel Prize for Physics) *Significance of Potentials in Quantum Theory.* February 10, 1961.

R. V. Pound (Harvard Univ.) *A Measurement of the Weight of Photons.* January 27, 1961.

E. C. Pollard (Pennsylvania State Univ.) *Radiation Action in Molecular Biophysics.* January 11, 1961.

C. W. Little (RCA Laboratories) *Engineering Problems of the Model-C Stellarator Machine.* January 6, 1961.

T. A. Vanderslice (GE Research Lab) *Ultra-High-Vacuum Techniques.* December 16, 1960.

G. Gould (Tech Research Group) *Coherent Generation of Light: LASER Devices.* December 9, 1960.

R. M. Scammon (Government Affairs Inst.) *Programming Election Predictions.* December 2, 1960.

V. W. Hughes (Yale Univ.) *Muonium.* November 18, 1960.

R. Heikes (Westinghouse Research) *Relationships Between Electrical and Magnetic Properties of Selenium.* November 11, 1960.

D. Wechsler (NYC College of Medicine) *Machine and Human Thinking.* October 21, 1960.

Hugh Odishaw (Space Science Board) *Some Aspects of the International Geophysical Year (IGY) of Current Interest.* October 14, 1960.

1959 – 1960

J. L. Delcroix (Univ. of Paris) *The Four Modes of Wave Propagation in Plasmas.* September 30, 1960.

Eugene N. Parker (Univ. of Chicago) *The Solar Wind.* April 22, 1960.

Ernest P. Gray (JHU/APL) *Diffusion and Recombination in Afterglows.* April 20, 1960.

W. Markowitz (U.S. Navy Observatory) *Precision Time and Frequency From VLF Transmissions.* April 15, 1960.

Buckminster Fuller (Southern Illinois Univ.) *Light-Weight Structures.* April 13, 1960.

N. S. Kapany (Armour Research Foundation) *Recent Work on Fiber Optics.* April 8, 1960.

C. N. Yang (Inst. for Advanced Study, 1957 Nobel Prize for Physics) *Some Considerations of Possible Experiments With High-Energy Neutrinos.* March 25, 1960.

K. R. Atkins (Univ. of Pennsylvania) *First, Second, Third, Fourth, and Zeroth Sounds in Liquid Helium.* March 18, 1960.

M. S. Livingston (Massachusetts Inst. of Technology and Harvard Univ.) *The 6-BeV Cambridge Electron Accelerator: Novel Problems.* March 11, 1960.

M. I. Nathan (IBM Research) *The Physics of the Esaki (Tunnel) Diode.* March 4, 1960.

N. Marcuvitz (Polytechnic Inst. of Brooklyn) *Fields and Plasmas.* February 26, 1960.

R. W. Hoffman (Case Inst. of Technology) *Magnetic and Mechanical Properties of Thin Films.* February 19, 1960.

R. D. Richtmyer (New York Univ.) *Some Numerical Calculations of Detached Shock Waves.* February 11, 1960.

Joseph Weber (Univ. of Maryland, College Park) *Gravitational Waves.* February 5, 1960.
