# ATLANTIC COAST OBSERVER NETWORK, MD / DE / DC CHAPTER WITH DATA FROM NEARBY AREAS

## HOT, HUMID, DRY

August 2006 was the hottest and driest summer month this year by far. Many stations recorded less than an inch of rain. For some it was the third month out of the past 12 where less than an inch of rain fell. Some observers reported their driest August on record (see observer notes for details).

The hottest weather occurred during the first few days. Readings of 100 degrees or higher occurred at many of the warmer locations. Temperatures from the 4th to the 29th were seasonally warm with no extreme heat. Maximum temperatures during the last two days were in the upper 70's, slightly below normal.

The only tropical storm to affect the region occurred very late on the 31st in the extreme southeastern areas. Details of effects of Tropical Storm Ernesto will appear in the September issue.

The heat wave, which began during the last week of July, peaked from the 1st to the 3rd. All stations east of Allegany County Maryland reported temperatures in the mid 90's to low 100's. The hottest temperatures observed by ACON observers were 103° by **Joe Manfre** of **Baltimore 2 SE** and 102° by **David Roth** of **Montgomery Village 1 SW**, both on the 3rd.

The 4th saw temperatures fall closer to 90 degrees and lower humidity levels.

Humidity levels increased on the 7th as well as temperatures. Scattered thunderstorms during the pre-dawn hours brought the heaviest rains of this dry month to many stations from North Central Maryland southeast to the Maryland Eastern Shore. The heaviest amounts reported by ACON

observers were 0.85" at **Harbeson 8S DE** by **Dean Dey**, 0.82" by **Dan Hanson** of **Pasadena 3 SW**, 0.75" by **David Bryant** of **Annapolis 2N**, and 0.79" by **Brian Smith** of **Oxon Hill**. For many stations this represented a large percentage of the entire month's total. **Joe Terry** of **Forest Glen** in Montgomery County lost power for 3 1/2 hours as result of the pre dawn thunderstorms.

The coolest period of the month occurred from the 11th to the 13th. Day-time temperatures were generally around 80 degrees while overnight minimums were in the 50's outside the areas heat islands. The coldest temperatures observed by ACON observers was 47° by **Al Kreinik** of **Parkton 5 SW**, and 48° by **Bobby Miller** of **Millers 4 NE**, **Rebecca Harvey** of **Eagle Rock**, and **Max Hutto** of **Smithsburg 1.5 SW**. Temperatures at NWS Salisbury even fell below 50.

The 14th to the 26th saw warm to hot conditions with some days of high humidity. Scattered thundershowers brought light amounts of rainfall to many but not all on the afternoon and evening of the 20th.

The extreme dryness was broken by heavy thunderstorms from the 27th to the 29th in the northern portions of Maryland and Delaware. **Bryon Lawrence** of **Frederick 3 WNW** reported 1.80", **Greg Keefer** of **Hagerstown 1E** 1.74", and **Gary Gallaher** of **Bear 2 SW DE** 1.66". Amounts of over 1.50" were also reported by **Steven Gallaher** of **North St. Georges DE**, **Max Hutto** of **Smithsburg 1.5 SW** and **Jim Vaughn** of **Smithsburg 2 NE**. These amounts represented 78% to 95% of their total rainfall for August. The heaviest rains in the region was 2.53" which fell at NWS Wilmington DE.

Rainfall amounts in the southern portions of Maryland and Delaware were much lighter. It had little to no effect on
