COLDEST FEBRUARY IN 28 YEARS

February will be remembered for the Valentine's Day Storm which brought heavy sleet, freezing rain, rain, and snow and cold temperatures. Otherwise, per a note in **Kevin Shaw's** summary, it was a quiet month. This February was the coldest February since 1979.

The cold which began on January 16 did not moderate until the 20th. Most of the precipitation fell during two events, the 13th-14th and the on the 25th. Minimum temperatures failed to rise above freezing at ACON stations at **Laurel 2E**, **Eagle Rock**, **Potomac 4N**, **Hagerstown 1E** in Maryland, **Bear 2 SW** and **Newark AG Farm** in Delaware and **Davis 3 SE** in West Virginia.

The month began mostly cloudy with maximum temperatures in the low to mid 30's and minimum temperatures in the low to mid 20's. Light wet snow and rain fell on the 2nd. The coldest weather of the season moved in on the 3rd and did not moderate until the 10th. Maximum temperatures remained below freezing from the 4th to the 10th at many stations. Temperatures failed to rise out of the teens or lower 20's on the 5th. Minimum temperatures fell below zero in the Maryland Mountains at **Eagle Rock** from the 4th to the 8th, and at **Frostburg** the 5th to 7th.

Very dry fluffy snow fell on the 7th. East of the mountains one to two inches fell north of the Washington DC region. The heaviest amounts observed was 2.5" by **Joe Manfre** of **Baltimore 2 SE** and **Greg Klein** of **Westminster 5 SSE**.

The most significant winter storm of the 2006-2007 winter moved into the region on the 13th. Precipitation began as snow except as rain in the eastern and southern regions. The precipitation changed to sleet as the temperatures fell from the low to mid 30's to below freezing. The sleet became heavy at times and was mixed with freezing rain in the eastern
