ATMOSPHERIC ELECTROMAGNETIC PROPAGATION

363  Infrared and Millimeter-Wavelength Absorption by Atmospheric Water Vapor  M. E. Thomas
370  Performance of Optical Sensors in Hypersonic Flight  W. J. Tropf, M. E. Thomas, T. J. Harris, S. A. Lutz
386  Detection of Propagation from a Heated Ionosphere  R. J. Lunnen, Jr.
404  Recent Advances in Prediction of Tropospheric Propagation Using the Parabolic Equation  G. D. Dockery, G. C. Konstanzer
413  Fine-Scale Measurements of Microwave Refractivity Profiles with Helicopter and Low-Cost Rocket Probes  J. R. Rowland, S. M. Babin
418  Worldwide Anomalous Refraction and its Effects on Electromagnetic Wave Propagation  J. P. Skura

BIOMEDICAL PROGRAMS

156  Insulin Treatment Enters the Space Age  W. McCloskey
162  *Principles and Models of Biological Transport*, by M. H. Friedman  A. S. Popel

INTRODUCTIONS, EDITORIALS

3  Guest Editor’s Introduction  R. C. Beal
292  Editorial  J. R. Apel
293  Guest Editor’s Introduction  D. G. Grant
362  Guest Editor’s Introduction  H. W. Ko

MISCELLANEOUS TOPICS

148  Protecting the Public from Fires  W. G. Berl
152  Molecular Collision Theory  L. W. Hunter
154  Writing Awards  W. G. Berl
272  Manufacturing Automation in Japan: A Trip Report and Observations  R. E. Kemelhor
278  In Memoriam: Gordon Leslie Dugger  C. O. Bostrom, W. H. Avery, J. Harford, F. S. Billig
282  Alexander Graham Bell Revisited  J. C. Murphy
284  The Twenty-Two Most Frequently Cited APL Publications – Afterthoughts  W. G. Berl
348  The APL Associate Staff Training Program  V. C. Messer, H. Malcolm, P. J. Herchenroeder, A. D. Goldfinger, D. S. Garlick, J. T. Everett, A. R. Jablon

OCEAN SCIENCE AND TECHNOLOGY

4  Symposium Overview  M. A. Donelan, W. J. Plant
7  Ocean-Wave Prediction: Where Are We?  O. M. Phillips
11  A General Explanation of the Quasi-Universal Form of the Spectra of Wind-Generated Gravity Waves at Different Stages of Their Development  S. A. Kitaigorodskii
15  Limitations of Spectral Measures and Observations of the Group Structure of Surface Waves  E. Mollo-Christensen
18  The Effect of Swell on the Growth of Wind Waves  M. A. Donelan

428

*Johns Hopkins APL Technical Digest, Volume 8, Number 4 (1987)*
The Present Status of Operational Wave Forecasting
The Operational Performance of the Fleet Numerical Oceanography Center Global Spectral Ocean-Wave Model
Recent Results with a Third-Generation Ocean-Wave Model
Practical Seakeeping Using Directional Wave Spectra
Some Approaches for Comparing Remote and In-Situ Estimates of Directional Wave Spectra
The Microwave Measurement of Ocean-Wave Directional Spectra
The Physical Basis for Estimating Wave Energy Spectra from SAR Imagery
The Physical Basis for Estimating Wave Energy Spectra with the Radar Ocean-Wave Spectrometer
Wave-Measurement Capabilities of the Surface Contour Radar and the Airborne Oceanographic Lidar
A Practical Methodology for Estimating Wave Spectra from the SIR-B
SIR-B Ocean-Wave Enhancement with Fast-Fourier Transform Techniques
The Age and Source of Ocean Swell Observed in Hurricane Josephine
Extreme Waves in the Agulhas—A Case Study in Wave-Current Interaction
Spectrasat: A Hybrid ROWS/SAR Approach to Monitor Ocean Waves from Space
The Radar Ocean-Wave Spectrometer
Panel Discussion: Is There a Clear Need for a Global Wave Monitoring System?

SPACE SCIENCE AND SATELLITE TECHNOLOGY

Spaceborne Imaging Radar Research in the 1990s: An Overview
Spectrasat Instrument Design Using Maximum Heritage
A Spectrasat System Design Based on the Geosat Experiment
The Navy Geosat Mission: An Introduction
The Geosat Ground Station
Determination of Ocean Geodetic Data from Geosat
Preliminary Results from the Processing of a Limited Set of Geosat Radar Altimeter Data
Introduction to Sea-Surface Topography from Satellite Altimetry
The NORDA Geosat Ocean Applications Program
Comparison of Geosat and Ground-Truth Wind and Wave Observations: Preliminary Results
Validation of Geosat Altimeter-Derived Wind Speeds and Significant Wave Heights Using Buoy Data
REX and Geosat: Progress in the First Year
Monitoring Equatorial Pacific Sea Level with Geosat
Ice Measurements by Geosat Radar Altimetry

Johns Hopkins APL Technical Digest, Volume 8, Number 4 (1987)
Waveform Analysis for GEOSAT Day 96
Design of the GEOSAT Exact Repeat Mission
Altimetric Data Assimilation for Ocean Dynamics and Forecasting
The Polar BEAR Spacecraft
Preliminary Observations from the Auroral and Ionospheric Remote Sensing Imager
Remote Sensing Imager Auroral Images from Space: Imagery, Spectroscopy, and Photometry
The Polar BEAR Magnetic Field Experiment
Anomalous Attitude Motion of the Polar BEAR Satellite
The Flight of Polar BEAR: A Successful Satellite Program Grows from Parts and Details
An Update on the Active Magnetospheric Particle Tracer Explorers (AMPTE) Program
